

Brazil Desk

Recent policy and legislative developments addressing corporate social and environmental responsibility, climate change and cross-border competition trends underscore the importance of economic and political relations between Brazil and Europe. BLOMSTEIN's Brazil Desk is well-positioned to advise clients in diverse matters involving Brazil and the European Union, in particular EU and German regulatory and competition matters, ESG, and international trade policy. Our expertise enables us to provide a consistent and combined approach to the relevant regulatory matters involving both the Brazilian and the European framework.

With five native Portuguese speakers and a unique proficient cultural competency, BLOMSTEIN's Brazil Desk is in a privileged position when it comes to understanding and dealing with the Brazilian-European business environment and legal framework. Our Lisbon Legal Hub further underlines our distinctive expertise to address matters related to Brazil. Attorneys qualified in Europe and Brazil combine solid experience in advising clients on the EU regulatory framework and on legislative and policy strategies. Furthermore, previous experience at the Brazilian competition authority as well as the Federal Government of Brazil of one of our team members further strengthen our deep understanding of regulatory and competition law matters.

We are co-authors of a monthly column called RegulaEuro in Brazil's largest legal online portal, [JOTA](#).

Multilateral Development Banks (MDB)

We represent clients in administrative sanctions procedures before multilateral development banks such as the World Bank and the IDB. As a World Bank accredited independent monitor, we review the sanctioned companies' compliance mechanisms and attest compliance with the conditions imposed. Aimed at decreasing clients' risks of facing administrative sanctions in MDB-financed projects, BLOMSTEIN also advises on self-cleaning programs in accordance with the established standards and guidelines.

Supply Chain and Corporate Sustainability Due Diligence

We are monitoring the proposed European Directive (2022/0051 – COD) on corporate sustainability due diligence obligations in relation to human rights and the protection of the environment. In addition, we are specialised in the German Supply Chain Act (LkSG) on the same topic, which is already in force. We counsel subsidiaries to German and

European companies, as well Brazilian companies trading in the EU on conforming with the relevant due diligence requirements. We also assist European companies with operations in Brazil to mitigate risks associated with their respective business sector.

Deforestation

We are monitoring the approval of the EU Deforestation Regulation (2021/0366 - COD) and we provide impact assessments for the Brazilian industries involved (e.g. cattle, cocoa, coffee, palm oil, soyn, rubber, timber - their by-products and products containing or result from these commodities). We advise our clients on compliance programs and on contractual terms in line with the proposed regulation as well as organising training and awareness campaigns. We also provide advocacy advice on policies and delegated acts related to the Deforestation regulation.

Carbon market

We are monitoring the approval of the EU Carbon Border Adjustment Mechanism (CBAM) (2021/0214- COD). We provide impact assessment for the affected sectors, especially the metallurgical sector (i.e. iron, steel and aluminium). We also assist clients in contractual negotiations and other matters relating to the European carbon market.

Green Hydrogen (GH2)

We provide support on the H2Global procurement programme to allow Brazilian sellers to take part on the auctions for long-term supply contracts to provide GH2 and its by-products. We also advise production projects on how to comply with European requirements to facilitate access to EU and development banks funding instruments. We also provide advocacy advice towards policies and regulation aiming to foster the green hydrogen industry in Brazil.

Taxonomy and reporting obligation

We have an extensive regulatory knowledge of the European Taxonomy on ESG activities, the Sustainable Finance Disclosure Regulation (SFDR) and the Corporate Sustainable Reporting Directive (CSRD). We assist our clients in preparing ESG reporting and projects in accordance with European classifications to enable access to European ESG investment funds.

Antitrust & Competition

Our expertise enables us to provide advice on a consistent and combined approach to matters involving the Brazilian and the European competition framework, with particular attention to merger filing obligations, and antitrust compliance by business groups trading or holding activities in Europe and Brazil. We are well positioned to provide clear

guidance on strategies that coherently accommodate the regulatory framework of all the jurisdictions involved.
